STAT

MEMORANDUM FOR:

Attached is a proposal of [redacted] which has obvious connections with the matters discussed recently between [redacted] Colby and myself. I think that [redacted] should keep an eye on this. If this is to become a community affair, and I think it should, a steering committee for the effort, consisting of an IC Staff man as chairman and representatives of the production agencies (CIA, DIA, INR and NSA), should be involved. Further, I think it should be funded on a community basis although the bulk of the funds might well come from ARPA. Any ideas on this matter would be appreciated.
